Example of how a binary tree is reconstructed, using the following traversal lists:
inorder = [3,2,4,1,5]
preorder = [1,2,3,4,5]

Draw a diagram showing the steps to rebuild a binary tree. Use the following lists:
inorder = [4,7,2,10,3,5,6,1]
preorder = [10,7,4,2,6,3,5,1]

preorder: root, left, right
inorder: left, root, right
